Re: King Systems

To Whom It May Concern:

I have had the pleasure of working closely with Glenn Harrison and David King from King Systems on our new facility in Englewood, Colorado. Glenn was instrumental in overseeing all phases of our audio/visual requirements during the build out. They not only did a great job on the facility but were able to do so while meeting our aggressive and accelerated time schedule for completion. I would recommend Glenn, David and King Systems for any construction project and look forward to working with them in the future.

Kind regards,

Melinda Kelley
