

## Letter of Recommendation for King Systems

We have been very pleased with our experience with King Systems. We started with our plans for a new single-family house and they were able to design a plan that incorporated all of our possible electronic needs. In the pre-wire design, they were able to accommodate our current needs but also to plan for future additions to the integrated systems. Their expertise allowed us to look at all of the options that our system can provide, whether it is something that we want now or may in the future. We chose some, but not all, of their many options and they went back and re-drafted the plans until we were absolutely satisfied. The prewiring they provided also seamlessly integrated with the electrical plan and they were in touch with the other electrical and internet professionals and vendors on the job to ensure that all went smoothly. When it came time to do installation of the actual system itself and components, they were quick and efficient and even bothered to clean up all packaging and materials, leaving it all perfect and ready to go. Whenever we have had questions about operations of the system (or really any questions) they are ready to answer immediately and have been very helpful. I would recommend King Systems to anyone who is in the market for this type of service. They do a great job!

Sincerely,

Annie Coburn
